OVERVIEW

With the ambitious INDC given by countries in COP 21 in Paris, there is the emergence of many new instruments for achieving that. The size of the low carbon economy expanded with increasing investment in climate mitigating activities. In this context, sustainable finance (also known as carbon and green finance) plays a crucial role in financing these activities. This course will provide a basic understanding of the concept of climate finance, the development, opportunities, challenges in the global and Indian contexts. It will also cover practical experience on financing in clean energy technology and newer policy instruments like a green bond. The course will also cover the perspective of all stakeholders, i.e., firms, policy makers, regulators, investors, and insurance providers.

IIT BOMBAY FACULTY

Prof. Trupti Mishra
Prof. Rangan Banerjee
Prof. D. Parthasarathi

INDUSTRY EXPERTS FROM CLIMATE BOND INITIATIVE

Mr. Sandeep Bhattacharya
Mr. Karthik Iyer

COURSE CONTENTS
